SIDDHANT SATISH DALAL

Nagpur, India • +91 7387453882 • siddhantsdalal@gmail.com • LinkedIn • GitHub

PROFESSIONAL SUMMARY

Java Backend Engineer with 5 years building **scalable, high-performance enterprise microservices** with deep **Spring Boot** craftsmanship across **financial-services and fintech** domains. Strong in **REST APIs**, messaging (**Kafka, JMS**), **concurrency and distributed-systems design**, **SQL**, performance tuning, **CI/CD**, and production observability. Hands-on **integrating LLMs into backend services** (**Anthropic Claude, AWS Bedrock**) plus **multi-LLM orchestration** (OpenAI, Gemini), tool/function calling, and **eval-driven iteration**, with substantial **GitHub Copilot/Cursor** use and **Python** for AI integration.

TECHNICAL SKILLS

Core Backend: Java (8–21), **Spring Boot**, Spring MVC, Spring Data JPA/Hibernate, Spring Security & OAuth2, **RESTful APIs**, **Microservices**, Distributed & Event-Driven Systems, **Concurrency & Multithreading**, System Design, **Performance Tuning & Scalability**, Design Patterns
Messaging & Data: Apache Kafka, JMS, Redis, **Advanced SQL** (PostgreSQL, Oracle, MySQL — CTEs, indexing, query optimization, tuning), MongoDB, ETL/Data Ingestion Pipelines
AI / Agentic Development: LLM integration (Anthropic Claude, **AWS Bedrock**, OpenAI, Google Gemini APIs), **multi-LLM orchestration**, tool / function calling, prompt engineering, **eval-driven iteration**, GitHub Copilot / Cursor (AI-assisted dev), **Python** for AI integration
Cloud & DevOps: AWS (EC2, ECS, S3, IAM), Azure (AKS), Docker, Kubernetes, **CI/CD** (Jenkins, GitLab, GitHub Actions), Observability & Monitoring, Git, Agile/SCRUM, Linux
Languages: Java, Python, SQL, TypeScript, JavaScript (ES6), Scala, Bash/Shell

EXPERIENCE

Software Developer, *TechBulls SoftTech Pvt. Ltd., Pune, India* Aug 2025 – Present

- Own and deliver **Java 8 + Python Spring Boot microservices** (Spring MVC, Spring Data JPA, OAuth2) end-to-end across **fintech and banking** engagements in Agile/Scrum; **integrated LLM capabilities via Anthropic Claude and AWS Bedrock** into backend services across multiple products; **cut p95 REST API latency** $\sim$**30%** via Redis caching and advanced SQL (CTEs, indexing, PostgreSQL tuning); deliver with substantial **GitHub Copilot/Cursor** usage and CI/CD on **AWS + Linux**.

Software Developer, *InBetween Software Development Private Limited, Goa, India* Sep 2024 – Apr 2025

- Architected 4 **Spring Boot + Node.js distributed, event-driven microservices** on Oracle/PostgreSQL for a scalable multi-format publication platform with **ETL/data-ingestion pipelines** and **AI-suggested templates (LLM integration)** for users; **cut async processing latency** $\sim$**40%** via **Kafka** event streams, containerized with **Docker** + Jenkins CI/CD on **AWS (ECS, S3, IAM) + Linux**.

Software Developer, *William Hill, London, UK* Mar 2023 – Jan 2024

- Designed and operated **high-traffic, fault-tolerant** Spring Boot RESTful microservices for payments, settlement, and reconciliation, sustaining **99.9% uptime** across **500K+ transactions/day**; migrated sync workflows to **multithreaded Kafka event-driven processing** ($\sim$25% faster confirmation), applied **system design, concurrency, and in-depth code reviews**, and drove **observability/incident response** across **25+ P1/P2 incidents** with **MTTR** $<$**30 min**.

Software Engineer, *Vision RT Ltd., London, UK* Sep 2022 – Mar 2023

- Built Java/**Spring Boot** services and **large-scale ETL/data-ingestion pipelines** with secondary C# / .NET Core work for safety-critical, high-reliability software; wrote **clean, testable code** with **TDD, design patterns, and CI/CD** to reach $\sim$90% unit-test coverage.

Application Developer & Coding Mentor, *iDOJO Ltd. (Code Ninjas), London, UK* May 2021 – Aug 2022

- Built a full-stack **Spring Boot** + SQL Server application tracking **300+ students'** progress; automated weekly reporting to **cut admin time** $\sim$**30%**; mentored learners (ages 7–14) in JavaScript and game development, building mentoring and knowledge-sharing experience.

PROJECTS

AI Document-to-App Orchestrator *(Personal)* — Orchestrates multiple LLMs (**Anthropic Claude, OpenAI GPT, Google Gemini**) to convert documents into working applications; **tool/function calling** and multi-step generation on a **FastAPI (Python)** backend, React/TypeScript UI, Docker, **142 pytest tests (eval-driven)** GitHub

AI-Interviewer *(TechBulls SoftTech Pvt. Ltd.)* — LLM-powered automated interviewing platform that generates questions, conducts multi-turn interviews, and **evaluates/scores candidate responses**; **Anthropic Claude** / **AWS Bedrock**, tool/function calling, Java/Python, **Spring Boot**, React/TypeScript, PostgreSQL, AWS.

Field-Force CRM — Bank Field Employees *(TechBulls SoftTech Pvt. Ltd.)* — Lead, customer, and field-visit management for banking field staff; Java 8, **Spring Boot** (Spring MVC, Spring Data JPA), OAuth2, PostgreSQL, Redis, REST APIs, AWS.

Supply Chain Finance (SCF) Platform *(TechBulls SoftTech Pvt. Ltd.)* — Invoice-financing and vendor-funding workflows for banking clients, with **Anthropic Claude** / **AWS Bedrock LLM integration**; Java 8/Python, **Spring Boot microservices**, Spring Data JPA, OAuth2, PostgreSQL, Redis, REST APIs, AWS.

Dispute & Chargeback Product *(TechBulls SoftTech Pvt. Ltd.)* — Card/payment dispute and chargeback lifecycle management, with **Anthropic Claude** / **AWS Bedrock LLM integration**; Java, **Spring Boot**, Spring Data JPA, OAuth2, PostgreSQL, advanced SQL, REST APIs, AWS.

Publication Suite *(InBetween Software Development Private Limited)* — Automated multi-format publication platform with ETL/data-ingestion and **AI-suggested templates (LLM integration)** for users; Java, **Spring Boot/Spring MVC**, Node.js, Oracle/PostgreSQL, **Kafka** event streams, Docker, Jenkins CI/CD, AWS.

Transactions & Betting Web Portal *(William Hill)* — High-throughput portal for managing transactions, placing bets, and settlement; Java, **Spring Boot RESTful APIs**, OAuth2, multithreaded **Kafka** event-driven processing, Redis, Azure (AKS/Kubernetes).

SimRT & AlignRT — Surface-Guided Radiation Therapy *(Vision RT Ltd.)* — Backend services and imaging workflows for clinical patient-positioning software; Java/**Spring Boot**, ETL/data-ingestion pipelines, C#/.NET Core imaging, TDD, CI/CD.

Real-Time Chat Platform *(Personal)* — Spring Boot, **WebSocket/STOMP**, **Kafka** pub/sub, Redis presence, React/TypeScript GitHub

Loan Application (FinTech) Microservices Platform *(Personal)* — Spring Boot, OAuth2/JWT, Kafka, Redis, PostgreSQL, React/TypeScript GitHub

EDUCATION & CERTIFICATIONS

MSc Network Management & Cloud Computing, Middlesex University, London (2021)
BCA Computer Science, Sri Shivaji Science College, Nagpur (2019)
Certifications: HackerRank Frontend Developer (React) & Angular (Intermediate)
